1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-6, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Kitamura et al. (US2001/0016249) for reasons of record and for reasons given below.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-26 of

copending Application No. 10/664872 in view of Kitamura et al. (US 2001/0016249) for reasons of record and for reasons given below.

3. Applicant's arguments filed December 28, 2004 have been fully considered but they are not persuasive. The disclosures at paragraphs 117, 118, 133 are not independent disclosures directed to unrelated embodiments. Contrary to applicants' assertions, these paragraphs appear to be directed to a single description of the invention. One of ordinary skill in the art would clearly have found the disclosures of these paragraphs to be intended for use together.

While the reference discloses preferences for cationic compounds in the underlayer, this is always set forth as an option or a preference. It is never recited as a requirement. Therefore, the reference discloses both embodiments, i.e. one with cationic compounds in the underlayer and the other without. This is part of the prior art disclosure.

Finally, applicants' claims are broad and read upon the applied art. Applicants argue that the recording medium is inferior when the ink receiving layer or the undercoat contains a cationic substance, but this is not represented in claim 1. In fact, claim 1 doesn't even require that there be an ink receiving layer or an undercoat layer. Consequently, applicants' arguments are not commensurate in scope with their claims.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
